The product lines are illustrated by star symbols at the top of the table; please refer to page **14** and **15**.

Technical Information

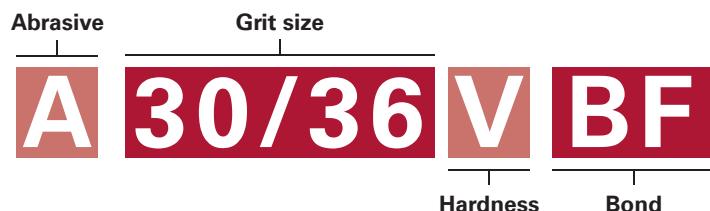

Durability

Resin bonded grinding and cutting wheels for free-hand application must be used within three years of manufacture. Please see metal ring for the expiry date which is specified by month and year; for instance V07/2018.

Labelling system for resin bonded grinding wheels

Example:

Abrasive Type	Grit			Hardness Grade			Bond
	coarse	medium	fine	soft	medium	hard	
A – aluminium oxide	12	36	60	M	R	U	BA – resin bond
C – silicon carbide	up to	up to	bis	Q	S	V	BF – resin bond, fibre-reinforced
Z – zirconia alumina	24	54	120	P	T	Z	

Working speed

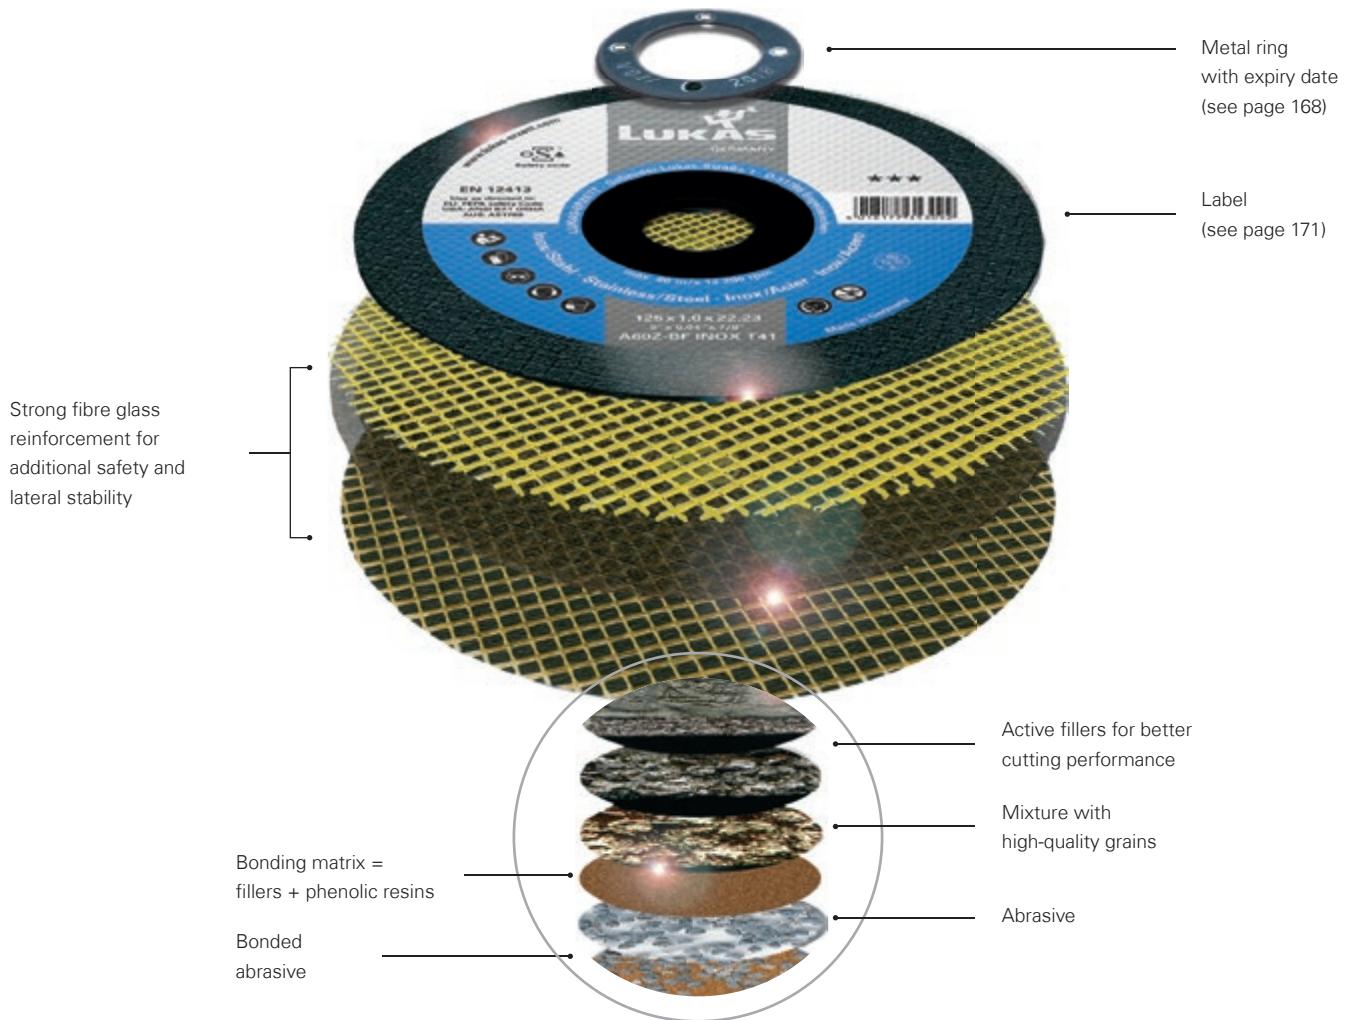

LUKAS grinding discs are developed and tested for specific maximum working speeds and grinding processes.

Prior to mounting the grinding tool on the machine, it must be ensured that the machine's nominal speed (as specified on nameplate) does not exceed the maximum operating speed indicated on the grinding wheel or disc.

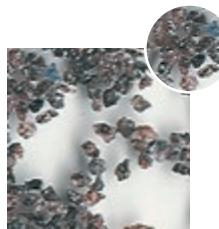

Maximum operating speed	Diameter of Disc [mm] /RPM [min-1]										
	50	76	100	115	125	150	180	230	300	350	400
80 m/s	30.500	20.100	15.300	13.300	12.200	10.200	8.500	6.600	5.100	4.400	3.800
100 m/s	38.200	25.100	19.100	16.650	16.600	12.700	10.600	8.300	6.400	5.400	4.700

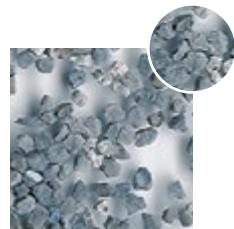

Structure and Components

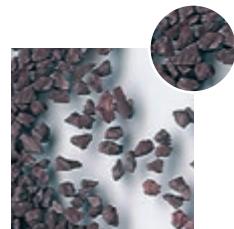

Abrasive

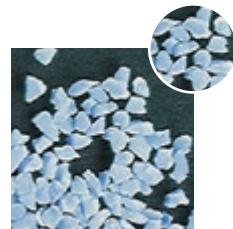

Semi-friable aluminium oxide

Zirconia alumina

Vitrified coated roasted aluminium oxide

Ceramic grain

Safety

With regards to occupational safety and operational convenience, LUKAS responsibility to the customer is taken very seriously. Our products are designed, manufactured and produced in accordance with the most stringent quality standards to provide a maximum of customer value at minimum risk. We are a member of both, the German Abrasive Association (VDS) and the Organisation for the Safety of Abrasives (oSa) and thus actively contribute to users' health and safety.

Applied standards:

- Safety Requirements for Bonded Abrasives Products: EN12413
- Safety Requirements for Diamond Blades: EN13236

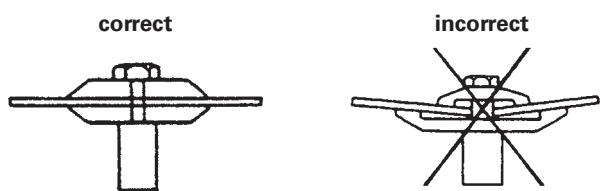

Safety recommendations

- Don't handle wheels roughly.
- Don't use non-reinforced cut-off wheels on portable machines.
- Don't store wheels in a damp atmosphere or in extreme temperatures.
- Don't mount a damaged wheel.
- Don't ever exceed the maximum operating speed marked on the wheel.
- Don't force a wheel onto a machine spindle.
- Don't use mounting flanges which are incorrect, damaged, dirty or burred.
- Don't tighten the mounting nut or locking flange excessively. To do so can distort the flanges and discs.
- Don't use a machine without a wheel guard.
- Don't use wheels without proper ventilation or dust protection equipment.
- Don't apply side pressure to cut-off wheels. You should not bend the wheel.

- Don't stop the wheel by applying pressure to the periphery or face. Always switch the machine off and allow the wheel to stop revolving.
- Don't allow the wheel to be trapped or pinched in the cut.
- Don't apply excessive pressure onto the wheel so that the driving motor slows down.
- Don't drop or lower a portable machine by the cable or airline onto the floor. A wheel can be easily cracked, if it is put down hard, by the weight of the machine. This is a common cause of wheel breakage.
- Don't grind with a depressed centre grinding wheel at an angle below 30 degrees to the work piece.
- Don't use a machine in a position where you do not have full control of the machine and you are not well balanced.

Clamping System

The use of flanges with unequal diameters is not allowed. Both flanges between which the bonded abrasive is mounted must have the same outer diameter and similar contact areas (according to EN60745-2-3:2007 and ANSI B.7.1).

Labelling

Safety standard

A = Aluminium oxide

C = Silicon carbide

AC = Aluminium oxide /
Silicon carbide

ZA = zirconia alumina /
aluminium oxide

60 = Grit size

(16/very coarse, 36/medium, 60/Fine)

B = resin bond

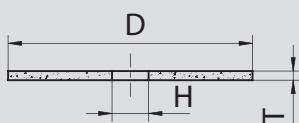

F = fibre-reinforced

125 x 1,0 x 22,23 = D x U x H

5" x 0,04" x 7/8" = D x U x H

Diameter x thickness x bore size

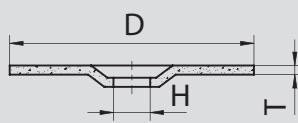

Types of resin-bonded grinding wheels

Cutting discs
U = (0,8 mm–4,5 mm)
(USA: Typ 1)

T 41
Straight cutting discs

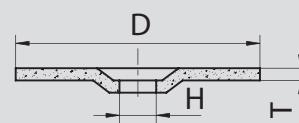

- Available in diameters from 50 (2") to 230 mm (9") for freehand applications
- from 300 mm (12") to 500 mm (20") for use in stationary machines

Cutting discs
U = (0,8 mm–4,5 mm)
(USA: Typ 27)

T 42
Depressed centre cutting discs

- Available in diameters from 76 (3") to 230 mm (9"), allowed for freehand use.

Grinding discs
U = (3 mm–10 mm)
(USA: Typ 27)

T 27
Depressed centre grinding discs

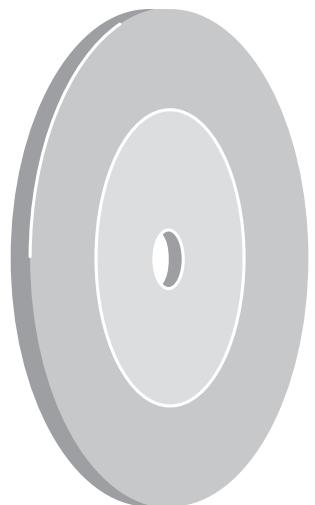

- Available in diameters from 76 (3") to 230 mm (9"), allowed for freehand use.

Cutting discs

174 Qualities and areas of application

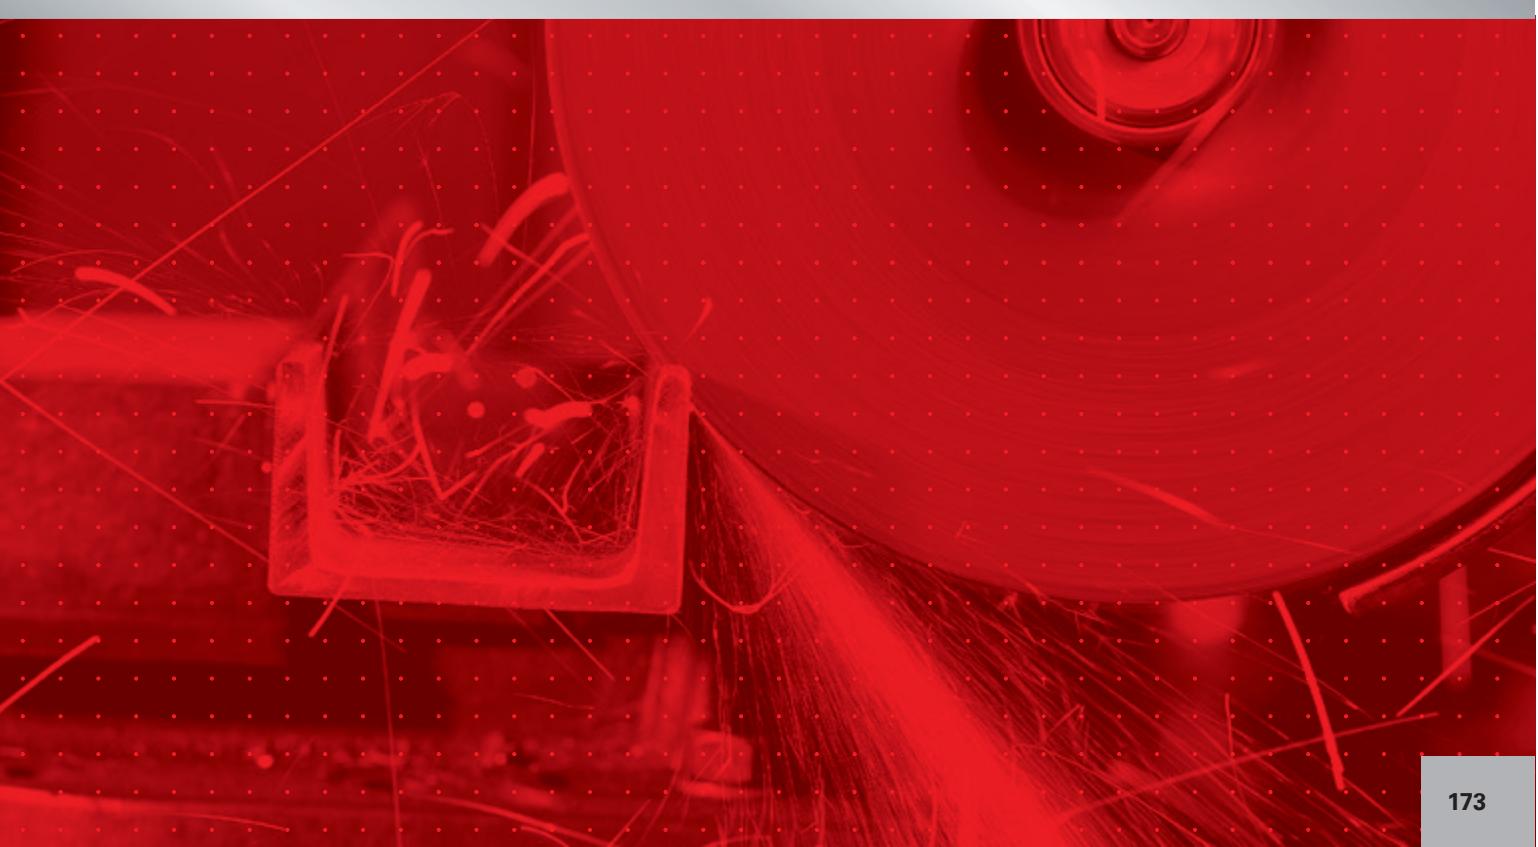

176 Free-hand cutting disc for angle grinders

183 Large cutting disc (greater than 230 mm)

Product line marking

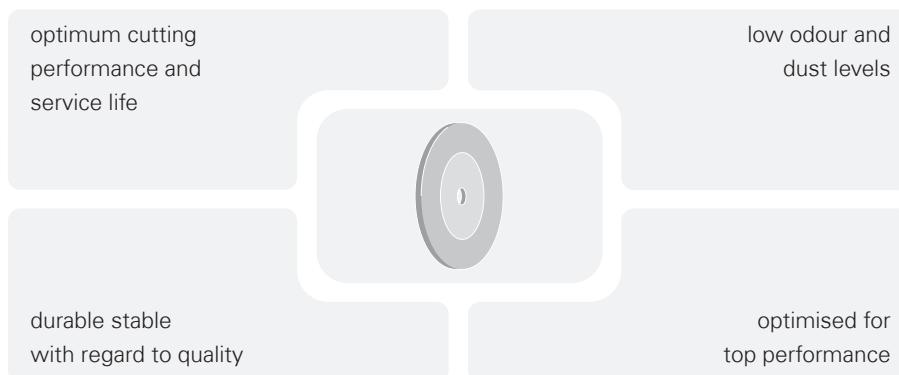

The product lines are illustrated by star symbols at the top of the table;
please refer to page **14** and **15**.

Cutting discs

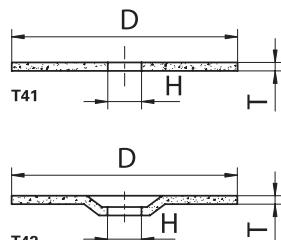

Type	Product line	Material

Progress

- maximum service life and cutting performance due to innovative bonding technology
- high cutting speed at low cutting temperature
- low odour and dust levels during daily usage
- ergonomic work position and maximum durability without use of excessive force
- maximum shelf life with high levels of stability with regard to quality thanks to top quality raw materials
- energy optimised for your high performance angle grinders
- environmentally friendly manufacturing process, made in Germany using up-to-date production processes and optimised formulations
- perfect for a wide variety of Inox and steel materials
- precise cutting

Progress

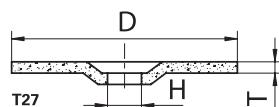

- maximum service life and cutting performance due to innovative bonding technology
- high cutting speed at low cutting temperature
- low odour and dust levels during daily usage
- ergonomic work position and maximum durability without use of excessive force
- maximum shelf life with high levels of stability with regard to quality thanks to top quality raw materials
- energy optimised for your high performance angle grinders
- environmentally friendly manufacturing process, made in Germany using up-to-date production processes and optimised formulations
- perfect for a wide variety of inox and steel materials
- precise cutting

Cutting and grinding
without tool change.

Safe. Precise. Perfect.

Grinding and cutting discs to machine stainless steel – PROGRESS COOL JOBBER
